The stock market was firm at the opening, and the prices were generally a small fraction higher than they closed last night, but the Vanderbilts | were an exception to this rule, and a break in New York Central and Lake Shore occurred immediately after the opening. The Gould stocks were well supported throughout the day, but the grangers and the Vanderbilts made important declines, the total decline in New York Central from the closing price last evening amounting to 2)4 per cent., while Lake Shore fell 2% per cent. The rest of the list yielded an average of 1 per cent., and, with a fair amount of business, the market continued weak until after I o'clock, when the decline was checked and a moderate rally follow.d. the market finally closing steady midway between the highest and lowest quotations, and at prices which are for the most active stocks 34 to 134 per cent, lower than they closed last evening. New York Central was an exception, making a net loss of 2% per cent.; Lake Shore ts down 1%, Michigan Central 154, St. Paul 156 Northwestern and Lacka-wanns each 34, Consolidated Gas and Rock Island each 134, Omaha common 1 and the preferred 34 per ceni., and the less active stocks generally for smaller tractions. Erie showed a gain of % per cent, and Pacific Mail, Oregon Navigation, Missour! Kansas and Texas and Texas Pacific are unchanged. Canada Southern developed extentional weakness, selling down from 27 to 28, and rallying to 25 on total sales of 1,018 shares.

The afternoon was well supplied with sensational rumors affecting the financial standing of some of the prominent houses on the street, but they could not be verified, and were probably only another device of the enemies of the ballevers in higher quotations. The impression prevails quite generally that the railroad war in the West i- largely the outgrowth of a desire on the part of certain officials of the roads to force down prices and an immediate settlement therefor. The tetal sales to-day were 259,759 shares, or 17,900 shares more than yesterday; but three stocks to-day, New York Central, Lake shore and St. Paul, monopolized 129,000 shares, or about one half of the day's business; while the Gould stocks were strong they were very quiet.

The railway bond market has seen less active today, the total sales being only \$924,000, a decrease from yesterday of \$557,000. The most active issues were the Erie seconds, new West Shore firsts, Denver and Rio Grande Western firsts and Missouri as compared with last previous sales. COMMERCIAL.

The past few days have witnessed a slight and irregular movement in the jobbing dry goods line, and trade is by no means active as a rule. The demand for consumption has been hindered by unseasonable weather, and conservative dealers are still inclined to the policy of buying as their stocks are depleted. Prices for leading articles are fairly well maintained, and the market is quoted as steady. There is a fair demand for groceries. Coffees are again weaker: the roasted grades are down %c, and green coffees are very dull. Sugars are up 16c. Fruits are firm at quotations; evaporsted apples are scarce and advanced Mc. The demand for staples in the drug market is quiet, but prices remain very firm. The tendency of linseed oil and white lead is upward, owing to a a combination by manufacturers. The egg market is weak, but poultry remains firm. The seed market is about closed for the season. We quote only timothy, which is advanced 10c per bushel. Clover and other seeds are about out of the mar-

GRAIN.

Wheat-Local prices feel the influence of light receipts and general firmness at other points, and are firm with a marked advance noticed for cash Celiveries of better grades. Futures not wanted Good milling demand for choice stock, and shipping inquiry for interior points is quite noticeable.

Produce Markets.

CHICAGO, May 7 .- Trading on 'Change to-day was on a more restricted scale than has occu witnessed in two or three weeks preceding, but the prevalent tone was one of strength and the closing quotations were about the best figures of the day. The advance in wheat was attributed to the cold wave, almost unprecedented in its intensity for this season of the year, and a continuation of pad crop reports. Foreign advices quoted wheat steady and firm while the amount on passage showed a reduction. The market opened % 3%c higher, and again advanced %c under good local and outside buying, receded %c, fluctuated, and finally closed 3 c over yesterday. Consols showed a moderate decline from opening quotations, but appeared to have very little effect upon the wheat market. The speculative trading in corn was only moderate, and the shipping demand was less urgent and comparatively slow. The receipts were a little larger, but influenced by the firmness in wheat, the market ruled stronger, and closed %@%c over yesterday. The trading in oats was of a very limited character, and prices ruled a shade easier. The dullness in provisions was very marked, and while prices ruled generally firm, very little change in prices occurred. Flour -Duil and unchanged. Wheat-Fairly active: the market opened % a comparison by bad crop reports. The market atvanced % additional on good buying, fluctuated, and closed %c higher. BITTING THE PIPE.

A Peep Into the Opium Joints on the Pacific Coast. Detroit Free Press.

"Although quite common in almost all the large cities in the West, the pernicious habit of opium-smoking, or 'hitting the pipe,' as it is usually called, is quite unknown in Detroit," said a well-known druggist a few days ago to a reporter for the Free Press.

"This habit," he continued, "has grown to an alarming extent on the Pacific slope, and in all other localities where Chinese are to be found in any great numbers. I have visited many of the Chinese opium joint, both in New York and San Francisco, and can tell at a glance whether a person is addicted to the use of the deadly drug or not. I have had strangers come into my store whose facial appearance indicated that they were the slaves of the habit, and so far as I knew there is no sure cure for it except to shun the drug as one would a vipor.

"The opium used by the Chinese is of an inferior quality, and is brought to this country in the form of a paste, put up in small round foil-lined boxes similar to those used for pills. The pipe is a curious-looking contrivance, and might be taken for a common walking-stick were it not for the little metallic bowl placed midway between the mouthpiece and the end of the stem. The stem itself is constructed of bamboo, one end being p ugged, the other atted with an amber or metallic tip. In the bottom of the bowl are two small holes, one of which leads through into the stem, the other only about half way.

"In using the pipe a small quantity of the opiom naste is relled up into a pellet and piaced on a wire, the end of which is inserted in one of the holes in the bawl of the pipe The smoker stretches his or her form on the floor or a low divan as the case may be, and ignites the opiom by applying the bowl of the pipe to the flams from a charcoal brezier. If it be his first attempt the initial whiff will be sufficient to partially strangle him, as the fumes of barning opium are exceedingly purgent and distasteful. Very soon he be comes accustomed to the peculiar taste, and gradually succumbs to its influence, as one does to an anasthetic, and finally drops off into a deep sleep. I tried it once, and that proved sufficient for me. I had the most delightful dreams, and imagined that I owned the earth, and had a chattel morigage ou the other planets. When I regained consciousness my head felt as large as a Saratogo trunk, and for two days at least every bone in my body sched as badly as if I had been punished with a club. I had no desire to try

"With some people, however, the habit grows like the taste for liquor, and they can no more control themselves than can a manise. The peculiar headache which followed my attempt does not continue after the first two or three lessons, and, unless a person has a very strong will, there is a likelihood of the practice being continued. Some of the joints in the Chinese quarter in San Francreco are fitted up regardless of expanse, and almost every night after the theaters, are out men and women-and some of them be -Quiet and easy: No. 2 cash or Msy. 52c: June, long to the upper crust—can be seen wend-51c asked; July. 513c. "As an instance of how far a man can go in this way I will state a little incident that came under any notice when I was walking the hospitals of San Francisco. One day & poor wreich was brought in, and on examination I found him to be delirious from optum smoking. In his ravings he negged for 'just one more pipe,' and finally to quiet him I administered a hypodermic injection of landannm. He soon recovered and was discharged. About six weeks afterwards the same man was brought back in precisely the same condition as at first. He again asked for opium, and on rolling up his sleeve for the purpose of giving the hypodermic injection I was somewhat amezed to find the arm covered with small pimples. Oa closer examination I discovered that the pimples were caused by the steel needle of a hypodermic syringe, with which the victim had injected laudanum into his veins instead of smoking opium. He did not live to repent of his folly, and that experience gave me some idea of the power of the drug over any

one sucicied to its use."

As I went down by Taunton town. Pondering thoughts of pain, The very genius of the spring Came glancing up the lane, Azure eyes, soft and wise,

A form of artless grace, Fluttering feet that skimmed the street Like swallows in the chase; Upon her arm of rounded charm

A maundo of nodding flowers, A radiant crew, still fresh with dew, From Quantoch's breezy bowers, Primroses, daffodils Into my neart they shone; And in their gleam of golden joy

All my grief was gone.

A word in common use among the Somerset English peasantry. -Speciator.
